PROFILE

Senior Software Engineer with 10+ years building and scaling web applications. Skilled in leading projects, delivering reliable, test-driven, and scalable solutions while collaborating across stakeholders.

AI-FIRST WORKFLOW

Day-to-day work powered by Cursor, Claude Code for agentic multi-file changes, and MCP-driven tools for contextual automation — while remaining the human in the loop for architecture, quality, and delivery.

SKILLS

AI & TOOLING

Cursor · Claude Code · MCP Servers · Conductor · Prompt Eng.

LANGUAGES

Ruby on Rails · Ruby · React · Ember.js · JavaScript · CoffeeScript · HTML · SCSS · SQL

ARCHITECTURE

GraphQL · REST APIs · RPC · Microservices

DATA & MESSAGING

PostgreSQL · MySQL · MongoDB · Redis · Kafka

CLOUD & DEVOPS

AWS · GCP · Heroku · Docker · CI/CD · CircleCI · Sidekiq

PAYMENTS

Stripe · PayPal · Braintree

TESTING

RSpec · Cucumber · Selenium · TDD

OBSERVABILITY

Datadog · Sentry · Last9 · Retool

EDUCATION

Master of Computer Application
GDCST · Sardar Patel University
Anand, Gujarat · 2014–2016

Bachelor in Computer Science
NCSC · VNSGU
Bharuch, Gujarat · 2011–2014

EXPERIENCE

Senior Software Engineer
Jan 2023 – Feb 2026

Jiva AgServices · Bangalore (Remote)

Tech: *Ruby on Rails · GraphQL · PostgreSQL · Kafka · Sidekiq · Retool · RSpec · CircleCI · MetaBase*

- Designed and developed scalable services using Ruby on Rails, GraphQL, and a microservices architecture.
- Built campaign management flows controlling user incentives and driving engagement and platform traction.
- Implemented commission and payout structures based on performance slabs for diverse user segments.
- Owned the end-to-end contract lifecycle — from creation and credit-limit breach management to invoice generation.
- Led large-scale financial migrations for partners, ensuring smooth transitions with minimal downtime.

Software Engineer
Sep 2019 – Nov 2022

Coupa Software · Pune (Remote)

Tech: *Ruby on Rails · Microservices · React.js · Redux.js · PostgreSQL · Apache Kafka · Sidekiq · AWS*

- Owned the sourcing module end-to-end — feature design, story creation, planning, peer reviews, test coverage and delivery.
- Been responsible for monitoring production issues and ensuring timely resolution.
- Collaborated with architects on design solutions and ensured robust, compatible API integrations.
- Partnered with product teams to prioritize requirements and drive architectural decisions.

Team Lead
Jan 2016 – Aug 2019

Narola Infotech · Surat

Tech: *Ruby on Rails · React · PostgreSQL · Sidekiq · AWS · CI/CD · Ember.js · CoffeeScript*

- Joined as one of the first Ruby on Rails interns and grew into a Team Leader over 3.5 years.
- Led delivery across projects including architecture, deployment, client interaction, and post-production support.
- Monitored and managed team performance, including daily standups, sprint planning, and retrospectives.
- Mentored interns and junior developers; managed task delegation and sprint delivery.
- Acted as cross-team technical unblock, maintaining high code quality and alignment with client requirements.

PROJECT HIGHLIGHTS

Jiva AgServices
AgriTech platform advising 10M+ farmers and processing 500K+ tonnes of harvest across India and Indonesia. by making agricultural supply chains more equitable for farmer communities.

Coupa BSM
Enterprise Business Spend Management platform — a network of 10M+ buyers and suppliers, and leading apps together on one unified platform.

Interstride
Global careers platform for international students — admissions portals, job search, and visa resources.

WeddingExpo
Bride-to-vendor marketplace with payments, email marketing, and live event support.

Nuntiux
Fintech platform connecting investors and students for education loans. Owned full architecture to deployment.

NextProof
Photo proofing SaaS that provides online gallery software and sales tools for professional photographers around the world.
